

THE TRANE CONNECTION

Trane unit finally replaced after 40+ years of operation!

Gensco's dealer, McCleary Heating and Air Conditioning, of Spokane, WA recently replaced a Trane RAUB 202 D Air Conditioner that was still in operation! This model was only manufactured from 1970 to 1974. McCleary had serviced the unit last year and it lasted another season! The homeowners decided to go ahead and replace it this year because it was getting "kind of old". This is yet another example that *It's Hard to Stop a Trane.*™

See pictures of the unit and the unit nameplate below:
